

How the ACT compares in climate policy and action

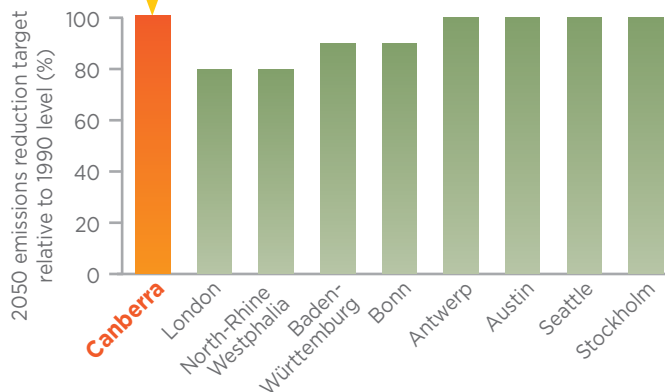

How the ACT compares in climate policy and action: Canberra is a leader on emissions targets and renewable energy, both within Australia and internationally.

2050 emissions reduction targets in Australia

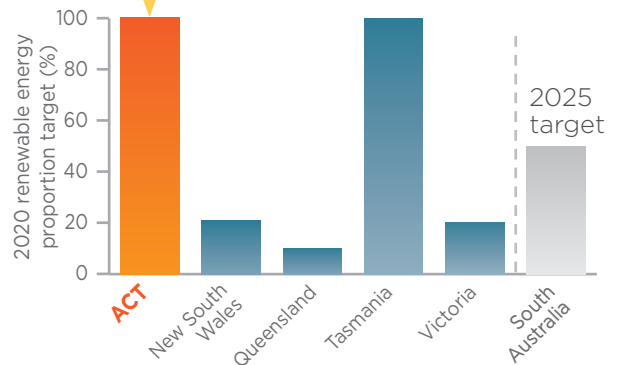

ACT 100% by 2050 on 1990 levels

Canberra's 2050 emissions reduction target is comparable to world leaders

2020 renewable energy targets Only four years to go

The ACT is leading the country in sourcing **new renewables** for electricity supply

Note: ACT target is for actual electricity use. Other jurisdictions' targets are for energy production.
