

Environment Minister ??? Really ?

Aren't the Native animals you plan to bash their brains in -part of the environment ?

Your intention to massacre these Australian mammals is Barbaric to say the least.

The way you plan to kill them is horrible resulting in leaving them to die of hypothermia or dehydration or hit by cars is almost even worse. It's just disgusting cruel barbaric and unnecessary

The science shows you don't need to cull kangaroos anyway because their population grows to carrying capacity of land and stabilises so it's impossible to find out why they do it. It's unnecessary and unbelievably cruel.

If you are going to kill them though find a more humane way of doing it than bashing their [joey's] brains out. It's a massacre.

I hope the Media get a hold of this. I may help with that !

Sincerely
