

2023 Kangaroo Management Program Shift Report

Date: Monday 10 July 2023

Shift time: Sch 1 1.14

Operational areas: Ainslie/Majura Sch 1 1.14 and Red Hill Nature Reserve.

Operations commenced at Sch 1 1.14 at Ainslie/Majura, and Sch 1 1.14 at Red Hill. Sch 1 1.14 operated at Red Hill and Sch 1 1.14 at Ainslie Majura.

Operations at Ainslie/Majura went smoothly. A small number of recreational users were identified in the reserve after the official closure of 1800, no delays in operation occurred. 65 animals were culled, leaving a target of 41. This will be the first year Ainslie Majura has been culled to target density. This has been achieved through a staged approach which at commencement presented a significant challenge. This has been coordinated to coincide with extensive rabbit control. This has addressed significant overgrazing that was present in many areas of the nature reserves.

Operations at Red Hill went smoothly. 30 animals were culled, this low number was as expected with the site becoming more challenging due to restricted areas of operation and moving closer to target density. Remaining target for Red Hill is 117, we are unlikely to meet that target. With two nights of operations remaining, we can expect to cull roughly half of the remaining target.

Sch 1 1.14

Operations ceased at Sch 1 1.14 at Ainslie/Majura and Sch 1 1.14 at Red Hill.

Unauthorised Activity

Sch 1 1.14 No unauthorised activity.

Police Liaison

AFP were notified of operations.

Safety

No safety issues.

2023 Kangaroo Management Program Shift Report

Date: Monday 12 July 2023

Shift time: Sch 1 1.14

Operational areas: Ainslie/Majura Sch 1 1.14 and Red Hill Nature Reserve.

Operations commenced at Sch 1 1.14 at Ainslie/Majura, and Sch 1 1.14 at Red Hill. Sch 1 1.14

Operations at Ainslie/Majura went smoothly. A total of 37 animals were culled at this site, 4 short of the target for this year. Two brief check fires occurred due to a recreational user (a runner, and cyclist at 0130), this caused very minor delays.

Operations at Red Hill went smoothly. 37 animals were culled, these low numbers were expected with the site becoming more challenging due to restricted areas of operation and approaching target density. Sch 1 1.14

Sch 1 1.14

Sch 1 1.14 attended todays briefing and visited Red Hill operations this evening to observe program delivery firsthand.

Operations ceased at Sch 1 1.14 at Ainslie/Majura and Red Hill.

Unauthorised Activity

Sch 1 1.14 . No unauthorised activity.

Police Liaison

AFP were notified of operations.

Safety

No safety issues.

Kangaroo Management Program Shift Report

Date: Thursday 15 June 2023.

Shift time: Sch 1 1.14

Operational areas: Ainslie/Majura and Red Hill Nature Reserves.

Tonight was night 4 of week 1 of the KMP and the last night this week. Two teams operated, one at Ainslie/Majura (Sch 1 1.14) and one at Red Hill (Sch 1 1.14). It was partly cloudy with no rain and a small crescent moon. Sch 1 1.14 carried out a smoking ceremony at Sch 1 1.14 for the safety of the program.

Operations went well at the Ainslie/Majura site and commenced at Sch 1 1.14. There was a delay starting due to several people recreating in the reserve. A check fire was called at 19:20 after a runner was in the reserve. It was lifted a short time later and operations continued until Sch 1 1.14 Sch 1 1.14

Operations commenced at Red Hill at Sch 1 1.14 Sch 1 1.14

A check fire was called at 20:15 and again at 00:35 both due to people recreating within the reserve. This delayed operations for approximately 45 minutes in total.

There were no incidents to report.

Kangaroo Management Program Shift Report

Date: Wednesday 14 June 2023.

Shift time: Sch 1 1.14

Operational areas: Mulanggari Grasslands and Red Hill Nature Reserve.

Two teams operated tonight, one at Mulanggari Grasslands Sch 1 1.14 and one at Red Hill Sch 1 1.14. Operations commenced at Sch 1 1.14 and ceased by Sch 1 1.14. It was a windy, misty night and a waning crescent moon.

The vet and butcher were both at the Mulanggari site. The vet carried out an audit on the Sch 1 1.14 shooters which was a less challenging site with the gentle undulating terrain. The butcher processed six kangaroo skins as well as dog bait meat.

Sch 1 1.14

There were no interruptions to operations and no incidents to report.

2023 Kangaroo Management Program Shift Report

Date: Monday 26 June 2023

Shift time: Sch 1 1.14

Operational areas: Ainslie/Majura Sch 1 1.14 and Red Hill Nature Reserve.

Shift two of the 2023 kangaroo management program commenced this evening. Sch 1 1.14 were operating tonight - one team at Mt Ainslie/Majura Sch 1 1.14 and one team at Red Hill Nature Reserve.

Operations commenced at Sch 1 1.14 at Ainslie/Majura, and Sch 1 1.14 at Red Hill.

Weather this evening was cool, with cold winds gusting between 15 – 20kmph (approx.) and a low of 5 degrees by Sch 1 1.14.

Operations at Ainslie/Majura were steady, focusing on the eastern side of Mount Ainslie Nature reserve initially. Operations moved into more productive areas on the western side of Mt Ainslie reserve at approx. 2030 where operations continued steadily for the remainder of the night.

Butchering operations were undertaken at Ainslie/Majura Sch 1 1.14. Butchering requires operational crews to stay in close contact with shooters and undertake regular trailer transfers to ensure a steady flow of carcasses for butchering. The team managed this additional requirement well with approx. 600 dog/fox baits butchered and 5 skins salted.

As with the previous shift, Sch 1 1.14

Operations ceased at Sch 1 1.14 at Ainslie/Majura Sch 1 1.14 and Sch 1 1.14 at Red Hill.

2023 Kangaroo Management Program Shift Report

Date: Thursday 29 June 2023

Shift time: Sch 1 1.14

Operational areas: Mulanggari, Ainslie and Red Hill Nature Reserve.

Tonight, was the final night of Shift two, Sch 1 1.14 started the night at Mulanggari where a target of 34 kangaroos remained and the second shoot team were back in at Red Hill where a target of 167 animals remained.

Operations commenced at Sch 1 1.14 at Mulanggari, and Sch 1 1.14 at Red Hill.

Weather was clear, cold with a chilly breeze. A temperature of 4 degrees was recorded at Sch 1 1.14.

Sch 1 1.14

Sch 1 1.14

Sch 1 1.14. The shoot team removed the remaining target number of animals by Sch 1 1.14 hours completing this site for 2023.

Achievement of the Mulanggari target by Sch 1 1.14 allowed the team to move operations to Ainslie/Majura Nature reserve for the remainder of the night. A sweep of the reserve was undertaken before operations commenced at Sch 1 1.14, continuing uninterrupted until Sch 1 1.14.

Sch 1 1.14, no unauthorised activity was witnessed, Sch 1 1.14. Two check fires were called due to cyclists. On both occasion Security were able to identify cyclists entering and leaving the reserve.

Culling operations at Red Hill were slow this evening, this is the fourth consecutive night at this site and animals were not in areas where they could be targeted easily.

The vet attended culling operations at Red Hill, completing the final night of the vet audit.

Operations ceased at Sch 1 1.14 at Mulanggari, Sch 1 1.14 at Ainslie/Majura and Sch 1 1.14 at Red Hill.

Unauthorised Activity

Sch 1 1.14 No unauthorised activity.

Sch 1 1.14

Police Liaison

AFP were notified of operations.

AFP attended reserve incursion at Mulanggari.

Safety

No safety issues.

2023 Kangaroo Management Program Shift Report

Date: Tuesday 27 June 2023

Shift time: Sch 1 1.14

Operational areas: Pinnacle Sch 1 1.14 and Red Hill Sch 1 1.14

This evening was night two of shift two - Sch 1 1.14 operated at the Pinnacle and a second Sch 1 1.14 operated at Red Hill.

Operations commenced Sch 1 1.14 at Pinnacle Nature Reserve and Sch 1 1.14 at Red Hill.

Weather was milder than the previous night with some cloud cover, very light winds, and a slightly warmer temperature of 6 degrees at Sch 1 1.14.

Tonight, is the first night of operating at the Pinnacle for some time. Target density was achieved at this site in 2015 and has remained at or close to target density since. The cull target of 51 was included in this year's program to maintain this status. The team achieved 100% of the cull target this evening.

The butcher was on site at the Pinnacle, this is the first-time butchering has occurred at this site. Typically butchering is done in larger sites where staging is very inaccessible to the public. The Pinnacle is a smaller site surrounded by arterial roads and a suburb on one edge, temporary fencing was erected and used to screen the butcher. If this model is successful, it will increase the number of sites that we can butcher and increase the number of carcasses that can be utilised. We will continue to test this approach.

The vet attended culling operations at the Pinnacle this evening, this was the second of three audit nights. The final audit night is scheduled for Thursday this week.

Sch 1 1.14 A check fire was called early in the night due to bike riders passing through the reserve. Bike riders were seen exiting the reserve shortly after, check fire was lifted and operations recommenced. There were no further interruptions at this site. 50 kangaroos were culled tonight leaving a remaining cull target of 220 for Red Hill.

Operations ceased at Sch 1 1.14 at Pinnacle and Sch 1 1.14 at Red Hill.

2023 Kangaroo Management Program Shift Report

Date: Wednesday 28 June 2023

Shift time: Sch 1 1.14

Operational areas: Ainslie/Majura Sch 1 1.14 and Red Hill Nature Reserve.

Operations commenced at Sch 1 1.14 at Ainslie/Majura, and Sch 1 1.14 at Red Hill. Sch 1 1.14 operated at both sites again tonight.

It was a cold start with 6 degrees recorded at the start of operations following a day of cold and wet weather. Showers cleared around 1800 however temperatures remained cold reaching 0 degrees at Sch 1 1.14.

Operations at Ainslie/Majura went smoothly. A handful of recreation users were identified in the reserve after the official closure of 1800, all recreation users readily complied with directions to leave.

Culling went well, and the team removed 58 animals, leaving a target of 124 for this site. All carcasses from operations at this site were processed by the butchering team.

Tonight, was the fifth and final night of butchering. Across the five nights approximately 3400 x 300gram baits were produced and a total of 28 skins are now being salted and prepared for tanning. Baits will be used for fox and dog baiting programs. Skins will be provided to Ngunnawal community for cultural use, some will be tanned by community, and some will be provided already tanned.

Operations at Red Hill tonight were challenging, due to the cold weather animals were not dwelling in lower and cooler part of the reserve where there is adequate backdrop for shooting safely. Shootable area at this site is already limited due to size and terrain, the team worked hard to remove 44 kangaroos.

Sch 1 1.14

Operations ceased at Sch 1 1.14 at Ainslie/Majura and Sch 1 1.14 at Red Hill.

Unauthorised Activity

Sch 1 1.14 No unauthorised activity.
