To the Manager, Conservation Research, Environment, Planning and Sustainable Development Directorate

Dear Sir or Madam

I am writing to express my shock and dismay at the increase in numbers of Eastern Grey Kangaroo to be culled in the Management Plan, including the bludgeoning of joeys. Please undertake a proper scientific review of numbers and consider other issues, such as increasing habitat. Non-lethal control measures are more appropriate should be explored as a priority, a cull is not only cruel but highly inappropriate.

Yours sincerely
