

The Government's ongoing illegal violent mass slaughter of the Kangaroos is not for Conservation purposes, they are for development and construction purposes driving protected native wildlife (flora and fauna) to extinction and destroying the Bush Capital.

It is ironic that the ACT Chief Minister has just introduced the words 'Bush Capital' onto ACT vehicle number plates and yet allows the ongoing illegal status and killing of native Eastern Grey Kangaroos etc, and the ongoing destruction of the Bush Capital for further developments and unaffordable constructions for trams etc. causing hardships and poverty to the ACT residents.

[Eastern Grey Kangaroos Draft Controlled Native Species Management Plan – Closes 24/3/17](#)

Eastern Grey Kangaroos Draft Controlled Native Species Management Plan – C...

Email: environment@act.gov.au – link to website: The Eastern Grey Kangaroo Controlled Native Species Manageme

New 1st paragraph beneath the environment email and web address and the 1st banner in italics:

'The Eastern Grey Kangaroo Controlled Native Species Management Plan is endangering the safety and lives of the public with no public notification and firearms being used at any time.'

Amended 3rd paragraph is now the amended 4th paragraph 'and Baldwin Drive' in italics:

'In 2008 I proposed a City Kangaroo Park and Wildlife Sanctuary, along William Slim Dr, Ginenderra Dr, *and Baldwin Drive*, submitting a map to show an educational public viewing glassed in Wildlife Hospital, viewing platforms, separate areas for wildlife rehabilitation for sick, injured, orphaned Kangaroos and other wildlife, kiosk, Laboratory, Emergency Centre, Recovery Room that would have raised a multi billion dollar revenue in the tourist industry for the ACT and save our protected native EGK's and other wildlife.

<http://www.gopetition.com/petitions/save-all-the-kangaroos.html>

Amended 18th paragraph in italics beneath photo showing 2008 BNTS Kangaroo cruelty photo:

'The Government has always continued the killing after their own

killing by placing poison baits in all the nature reserves, and then putting *hooved* cattle and sheep *that cause irreparable damage to the biomass and endangered species named by the Government*, into the nature reserves to graze down the grass to prevent a fire hazard, which the *soft footed* Kangaroos, *that don't cause any damage to the biomass*, do if they are not misrepresented, not mismanaged, and not killed. This is after all suppose to be the bush capital and not the farmers capital.'

Amended the Code of Practice is in breach....in italics:

'The Code of Practice is in breach of the Animal Welfare Act violently bashing Joeys to death. The shooters *are also in breach of the Code of Practice* who always have mis shots that means that adult roos are also tortured to death. These killings are nothing but a violent blood sport introducing and educating violence in the ACT that is completely unacceptable and inappropriate.

Updated Draft, 3rd paragraph with additional photos: [Eastern Grey Kangaroos Draft Controlled Native Species Management Plan – Closes 24/3/17](#)

**Eastern Grey Kangaroos
Draft Controlled Native
Species Management
Plan – C...**

Email: environment@act.gov.au – link to website: Lowland grasslands and woodlands still contain predators caus

Subject: EGK Draft Controlled Native Species Management Plan

Lowland grasslands and woodlands still contain predators causing the Kangaroo population to be weakened and being driven to extinction with the additional inhumane infertility program and mass violent killing of the Kangaroos by the Government with their mismanagement of the Kangaroos.

Predators: additional recently introduced Spotted-tailed and Eastern Quolls, Raptors, domestic animals, domestic pets, the Government are the worst predators, farmers, hunters, road strikes, foxes, commercial industry that was used at Googong Dam, construction sites, loss of habitat for construction of unnecessary trams that the ACT can't afford and is costing the ACT more homelessness rating the ACT the highest in homelessness in Australia, etc, unnecessary housing development just building more empty houses that no one can afford to buy or rent all destroying our bush capital and destroying in what would be a multi billion dollar tourist industry in the ACT by wiping out and driving our Kangaroos to extinction.

In 2008 I proposed a City Kangaroo Park and Wildlife Sanctuary, along William Slim Dr, Ginenderra Dr, submitting a map to show an educational public viewing glassed in Wildlife Hospital, viewing platforms, separate areas for wildlife rehabilitation for sick, injured, orphaned Kangaroos and other wildlife, kiosk, Laboratory, Emergency Centre, Recovery Room that would have raised a multi billion dollar revenue in the tourist industry for the ACT and save our protected native EGK's and other wildlife.

<http://www.gopetition.com/petitions/save-all-the-kangaroos.html>

Instead of spending taxpayers money on the Kangaroo Park and Wildlife Sanctuary to raise a multi billion dollar revenue for the ACT, the Government has irresponsibly continued to abuse taxpayers money on fraudulent reports on Kangaroos, unnecessarily killing Kangaroos driving them to extinction, inhumane infertility program driving them to extinction, illegally arresting and locking up innocent people and dragging innocent people through Court, viciously harassing, bullying and defaming innocent people, your experts, etc., when it has always been the Government breaking all the laws, <https://wildlifecarersgroup.wordpress.com/2015/04/20/wildlife-carers-group-news-21415-stop-the-violent-roo-kill-invite-to-book->

[launch-animal-justice-party-more/](#), <http://www.canberratimes.com.au/act-news/no-action-to-be-taken-on-illegal-use-of-silencers-in-kangaroo-cull-since-2009-20170113-gtqtfz.html>, [Canberra kangaroo cull in 2015 was unlawful, judge says](#), instead of working with the independent experts, listening and stopping the killing.

Canberra kangaroo cull in 2015 was unlawful, judge says

The kangaroo cull in Canberra last year was unlawful, an ACT Supreme Court Justice says

Last year's was the biggest cull since 2011, with 1989 animals violently and inhumanely shot and another 800 pouch young violently killed.

I have sent 3 petitions to the Government to stop the Kangaroo killing currently raising 8,805 signatures of support in total for the Government to stop the Kangaroo killing, as of 19/3/17, all inappropriately ignored.

I am submitting these 3 petitions again to the Government in this submission to stop your persecution, fraudulent reports, mismanagement and misrepresentation, your false manipulated population figures, and killing of Eastern Grey Kangaroos.

As of 19/3/17:

1. <http://www.gopetition.com/petit.../save-all-the-kangaroos.html>
- 2,374 signatures
2. <http://www.change.org/.../chief-tams-ministers-stop-the-unlaw...>

- 5,261 signatures

3. <http://www.communityrun.org/.../stop-the-unlawful-violent-kil...>

- 1,170 signatures

Total: 8,805 signatures.

Read more: <https://wildlifecarersgroup.wordpress.com/.../wildlife-carer.../>, <https://wildlifecarersgroup.wordpress.com/2013/10/>, <http://wildlifecarersgroup.wordpress.com/.../wildlife-carers.../>

I have inspected the Kangaroos that are becoming quite weak due to the ongoing mismanagement of the Government through mass killing and the infertility program, seeing separated Joeys through the additional kangaroo proof fencing that has gone up around the ACT without any consultation with the public, that the Government have constructed to make it easier for the Government to trap and kill the Kangaroos not leaving any escape for them.

It is recommended that these fences be removed and replaced with wildlife corridors instead.

Fences are not necessary that cause injuries with wildlife getting injured as they get caught up in them when fleeing causing prolonged agonising death to them, and when there are fenceless technology around using sensors. Cars are now fitted with sensors to avoid collisions, shu roos can be installed.

Sensor deterrents can also be used as a form of an anklet or bracelet for cyclists, joggers, otherwise avoid the areas where the Kangaroos are and give way to them.

Kangaroos are unnaturally isolated from each other due to this Government's misrepresentation and mismanagement of kangaroos. Joeys separated from their mob, only small mobs can be seen that quickly disappear due to the Government already exercising their ongoing illegal killing of protected native wildlife and already using this controlled native species management plan as multiple firearm shots are heard.

It has been scientifically proven that by fencing in Kangaroos that

it showed that the Kangaroos save our endangered species and save their habitat through their gentle grazing and natural fertilisation stimulating the regrowth. It has been scientifically proven that the areas where the Kangaroos were fenced out of, the habitat and the endangered species all died because it lacked the Kangaroos gentle grazing and natural fertilisation that promoted the regrowth of the endangered native species habitat. This applies to all native species. (Ref: Don Fletcher - TAMS Senior Ecologist)

It has also been scientifically proven that the Government has no science in their killing of Kangaroos, that it is all science fiction.

It is highly recommended that all the fencing be removed, all the killing and the infertility program to be stopped to allow the natural stimulation of regrowth caused by Kangaroos all over the ACT that also assist in keeping the fire hazard down.

The Government has always continued the killing after their own killing by placing poison baits in all the nature reserves, and then putting cattle and sheep into the nature reserves to graze down the grass to prevent a fire hazard, which the Kangaroos do if they are not misrepresented, not mismanaged, and not killed. This is after all suppose to be the bush capital and not the farmers capital.

First the Eastern Quolls were released where the Bettongs were fenced in at Mulligans Flat so that the Government can abuse and waste more taxpayers money and get the Bettongs violently killed by the small Eastern Quolls, where they have no escape.

Then the Government released the larger species Spotted-tailed Quolls in Mulligans Flat as well to abuse and waste more taxpayers money so that the Spotted-tailed Quolls can kill the smaller species Eastern Quolls and Bettongs, all of them fenced in with no escape, turning Mulligans Flat into one big violent blood bath.

This is ongoing abuse and waste of taxpayers money for these programs.

These Quolls that are new predators for our Macropods are also killing our Kangaroos and their Joeys that are already also being

driven to extinction with ongoing violent killing illegally committed all year round by the Government and their infertility program that are all weakening the species driving them to extinction.

The Kangaroos are not responsible for killing off bettongs and bandicoots, the Government is through their ongoing misrepresentation and mismanagement of all wildlife.

Kangaroos maintain a healthy well balanced Eco system.

With the amount of taxpayers money that the Government has abused on all of the above, the Government could've constructed 3 of my proposed Kangaroo Parks and Wildlife Sanctuary around the ACT by now.

The Code of Practice is in breach of the Animal Welfare Act violently bashing Joeys to death. The shooters always have mis shots that means that adult roos are also tortured to death. These killings are nothing but a violent blood sport introducing and educating violence in the ACT that is completely unacceptable and inappropriate.

<http://www.canberratimes.com.au/act-news/its-a-massacre-the-cruel-fate-for-pouch-young-in-canberras-kangaroo-cull-20170209-gu8zqi.html>,

<https://wildlifecarersgroup.wordpress.com/2015/04/20/wildlife-carers-group-news-21415-stop-the-violent-roo-kill-invite-to-book-launch-animal-justice-party-more/>.

Because of the ongoing misrepresentation and mismanagement, and fraudulent reports repeatedly written about our Eastern Grey Kangaroos by the Government that is then illegally sent out to the media by the Government, it is not recommended that the EGK's status be amended to a controlled native species under the Nature Conservation Act 2014, and that the controlled native species status be immediately removed from the Nature Conservation Act 2014, and under these conditions, it is highly recommended that the Government abort the Controlled Native Species Management Plan.

Furthermore, it is highly recommended that the Government also abort the no kangaroo policy in the ACT and provide full term rehabilitation of all sick, injured, orphaned Eastern Grey Kangaroos

through their Wildlife Rehabilitation Licence.

It is highly recommended that the 3 Petitions above be actioned to immediately stop the Kangaroo killing, to save the rest of our native wildlife, and to stop the violence.

Sincerely
