

ACT Heritage Council

Entry to the ACT Heritage Register

Heritage Act 2004

20124. Aboriginal Places – District of Belconnen

Part Section 4, Block 17 and Section 3, Block 1

Bruce

Part Sections 87 and 92, and part Section 45, Block 1

Dunlop

Part Section 13, Block 2; Section 4, Block 1 and *Section 6, Block 2 (National Land)*

Lawson

Part Section 64, Block 5

Fraser

Part Blocks 50, 166, 180, 181, 183, 1020, 1355, 1360, 1429, 1439, 1473
(*National Land*), 1502, 1518, 1543, 1544, 1547, 1550, 1553, 1556, 1558,
1566, 1569, 1571, 1572, 1600, 1601 and unnumbered blocks

District of BELCONNEN

This entry which was previously part of the old heritage places or the old heritage objects registers (as defined in the *Heritage Act 2004*), as the case may be, is taken to be registered under the *Heritage Act 2004*.

Conservation Requirements (including Specific Requirements), as defined under the *Heritage Act 2004*, that are contained within this document are taken to be Heritage Guidelines applying to this place or object, as the case may be.

Information restricted under *the old heritage places register or old heritage objects register* is restricted under the *Heritage Act 2004*.

ACT Heritage Council

**AUSTRALIAN CAPITAL TERRITORY
INTERIM HERITAGE PLACES REGISTER**

For the purposes of s. 56 of the *Land (Planning and Environment) Act 1991*, a listing for the following places has been prepared by the ACT Heritage Council, for the purpose of including:

Aboriginal Places in the District of Belconnen

(Including currently known Aboriginal sites and potential archaeological deposits in the following suburbs and land management areas):

- **Aboriginal Places in the Suburb of Bruce (4)**
- **Aboriginal Places in the Suburb of Dunlop (4)**
- **Aboriginal Places in the Suburb of Lawson (14)**
- **Aboriginal Places in the Suburb of Fraser (1)**
- **Aboriginal Places in Belconnen District (77)**

In an interim Heritage Places Register.

Copies of the listing are available for inspection at ACT Public Libraries and at all ACT Government Shopfronts.

The Secretary
ACT Heritage Council
PO Box 144, Lyneham, ACT 2602

Telephone: (02) 6207 7378 Facsimile: (02) 6207 2200

Public Notification: Notifiable Instrument NI2002-20 (effective 24 January 2002)

IDENTIFICATION OF THE PLACES:

The places comprise Aboriginal sites within:

- part Block 17, Section 4 and Block 1, Section 3, Bruce
 - part Sections 87 and 92, and part Block 1, Section 45, Dunlop
 - part Block 5, Section 64, Fraser
 - part Block 2, Section 13, and part Block 1, Section 4, Lawson
 - part Blocks 50, 166, 180, 181, 183, 1020, 1355, 1360, 1429, 1439, 1502, 1518, 1543, 1544, 1547, 1550, 1553, 1556, 1558, 1566, 1569, 1571, 1572; 1600; 1601 and unnumbered blocks in Belconnen District.
-
- part of the following blocks currently comprising National Land: Block 1473, Belconnen District, Block 2, Section 6, Lawson

The places are within Belconnen District as identified in Figure 1.

The Canberra 1:10 000 Adjusted Grid Coordinates (AGC) for the places are held within a database of ACT site locations. The 1:10 000 grid co-ordinates are restricted information under s.82 of the Act.

FEATURES INTRINSIC TO THE HERITAGE SIGNIFICANCE OF THE PLACES:

The places comprise:

1. Eucalypt trees (whether living or dead) and their buffer zones (as specified in Schedule 2) **(5)**;
2. Locations where Aboriginal flaked stone artefacts have been recorded, some with associated archaeological deposit, and their individually specified site buffer zones (as specified in Schedule 2) **(92)**;
3. Rockshelters with associated archaeological deposit (as specified in Schedule 2) **(1)** ; and
4. Locations where potential archaeological deposits have been identified (as specified in Schedule 2) **(2)**

STATEMENT OF SIGNIFICANCE:

These sites are all part of the physical evidence of a traditional way of life that is no longer practised within the ACT. The presence of artefact scatters and scarred trees in these localities demonstrates occupation and use of the place by Aboriginal people, in the past. The areas of archaeological potential are considered to be significant cultural resources because they may contain occupation evidence that has been subject to a lesser degree of disturbance from European landuse practices and erosion. Their true informational value, scientific value and significance to Aboriginal people can only be realised or determined through further research.

Stone artefacts constitute an enduring record of Aboriginal technology and settlement patterns. Stone was a central resource in past Aboriginal economic systems, essential in the technological and day to day life of the population. Many of the sites do not present individually outstanding qualities since their condition and integrity have been reduced by modern landuse activities. However, as a related body of evidence with potential to inform about a regional pattern of past Aboriginal landuse practices and settlement patterns, these sites are significant.

The individual artefacts at the sites have scientific and educational potential for the study of Aboriginal stone technology. Locational and descriptive information about them builds upon and complements the considerable body of archaeological research that exists for the Canberra region. Artefacts already collected from these places constitute a valuable educational resource.

Culturally scarred trees are considered to be of archaeological significance for their potential demonstration of ways of life no longer practised and ability to contribute to a wider understanding of cultural history.

The ACT Aboriginal community considers all evidence of the occupation of the ACT by Aboriginal people to be significant. Aboriginal artefacts are considered to be of significance since they demonstrate past Aboriginal land use. The community has also indicated that trees considered to be scarred by Aboriginal people are highly valued and represent the continuity of local Aboriginal culture. Their protection and conservation has a high priority.

SPECIFIC REQUIREMENTS FOR ABORIGINAL PLACES IN THE DISTRICT OF BELCONNEN

Some of the blocks of land containing some of the sites are classified as National Land under the National Land Ordinance 1989 or subsequent amendments. Some blocks are also specified as Designated Areas under the National Capital Plan. Relevant approval processes are described as follows: -

- Work carried out on National Land in Designated Areas is subject to the approval of the National Capital Authority.
- Work carried out on Territory Land in Designated Areas is generally subject to approval by the National Capital Authority but Territory Planning requirements may also apply to development where the Territory is the approving Authority.
- Work carried out on National Land outside Designated Areas must be in accordance with a Development Control Plan agreed by the National Capital Authority that reflects the requirements of the Territory Plan.
- Work carried out on Territory Land outside Designated Areas is subject to the Territory Plan and Territory Approval processes.

In accordance with s.54(1) of the *Land (Planning and Environment) Act 1991*, a series of specific requirements have been identified as essential to the conservation of the heritage significance of Aboriginal Heritage places on Territory Land. The specific requirements have been prepared to implement conservation policies and objectives developed for the places. Any actions that affect the conservation of the heritage significance of the places constitute 'development' for the purposes of the Act and approval will be required prior to undertaking the action. To undertake development without approval may be an offence.

The applicable specific requirements for each identified heritage place are set out in Schedule 2. These requirements apply only to works undertaken where the Territory is the approval authority.

General Conservation Policy – All Sites:

Aboriginal archaeological sites are to be conserved appropriately in accordance with their individual heritage significance, taking into account their Aboriginal and archaeological heritage values. Aboriginal sites and their components form an integral part of the landscape. The spatial relationships between sites as well as their geographic relationship to land constitute significant information with potential to inform about past cultural practices. The maintenance of records about sites and their geographic location is essential for the conservation of this information. Areas that have potential to contain Aboriginal heritage sites, including areas in which archaeological survey has not yet been undertaken, are to be managed in a way that permits the identification, significance assessment and conservation, where appropriate, of the Aboriginal cultural heritage resource.

Artefact Scatters (Open Scatters)

Artefact scatters constitute identifiably dense occurrences of stone artefacts and represent geographic foci of Aboriginal occupation related to a range of activities. Scatters may form as a result of single intensive occupation events or build up over hundreds or thousands of years due to repeated use or occupation of an area. The current appearance and structure of an artefact scatter site will depend upon the impact of events, termed *formation processes* that have affected the artefacts during and after their deposition. Formation processes include both natural and cultural factors including soil erosion and deposition, other natural disturbances, reuse of places by Aboriginal people and later European landuse practices. The heritage values of artefact scatters are based upon their Aboriginal and archaeological significance.

Their significance to Aboriginal people is primarily based on their provision of evidence of the occupation of land by their ancestors. Artefact scatters thus comprise a demonstrable link to place for contemporary Aboriginal people. Their archaeological significance stems both from their physical representation of past cultural practice and for their potential to yield information through research that will increase our understanding of the past. The potential research value accorded to sites depends in turn on a range of factors including the individual quality and quantity of artefactual content, the condition and integrity of the site structure, whether the artefacts occur *in situ* within cultural deposit, and whether original relationships between artefacts are likely to be discernible and meaningful. The significance of artefact scatters may be thus ranked from low to high according to their value to Aboriginal people, their archaeological value and their condition and integrity. Their significance to Aboriginal people may not necessarily, however, relate to or accord with archaeological significance assessments.

Artefact Scatters of Low Conservation Value

Artefact scatters identified as having low conservation value are those sites with very few artefacts, with artefacts of a common type, with no associated cultural deposit and/or sites that have already been highly disturbed and where there is negligible potential for them to provide further information. Such sites may either be conserved *in situ* or be the subject of a program of archaeological investigation and salvage as recommended by the Heritage Council, after consultation with the relevant Aboriginal organisations.

All Aboriginal sites are considered to be significant by the Aboriginal community. Aboriginal people generally express the desire for all cultural heritage sites to be left *in situ* wherever feasible.

Conservation Objective – record and retain where feasible, otherwise salvage

Specific Requirements – Artefact Scatters of Low Conservation Value

- L1** Information regarding the description and specific location of the place shall be held in a database of ACT Aboriginal heritage sites.
- L2** Actions that would affect the conservation of the heritage significance of the place constitute 'development' for the purposes of the Act.
- L3** Works that improve or benefit the conservation of the heritage significance of the place are permitted. Proponents of such works shall advise the Heritage Council and consult with the relevant Aboriginal organisations about the proposal. The agreement of the Heritage Council must be obtained prior to works being undertaken.
- L4** Development proponents shall be aware that the presence of an Aboriginal heritage site or sites within a development area may impose constraint upon the development. The nature of the constraint will vary according to the assessed significance of the site/s and the potential heritage impact of the development. For *Artefact scatters* assessed as being of *low conservation value* the development constraint may range from nil constraint to a requirement to undertake further survey or investigation of a place, further recording of a place and/or collection of artefacts or other cultural materials.
- L5** The ACT Heritage Council shall advise the proponent of the degree of constraint, based upon the nature of the development and its potential heritage impact and the significance assessment of the site/s, and in consultation with the relevant Aboriginal organisations.
- L6** Artefacts and/or any other identified significant fabric or components of the site shall not be removed, damaged, altered or disturbed without the prior agreement of the Heritage Council, in consultation with the relevant Aboriginal organisations.

- L7** Any further investigation of sites and/or collection of artefacts and/or salvage of site fabric or other cultural materials agreed to by the Heritage Council shall be undertaken by a qualified archaeologist in consultation with the relevant Aboriginal organisations, in accordance with a proposed methodology provided to and endorsed by the Heritage Council, in consultation with the relevant Aboriginal organisations.
- L8** Salvaged or collected materials shall be archived by the Heritage Unit, pending establishment of an appropriate storage facility.
- L9** If collection or salvage of all of the place is advised by the Heritage Council then, following completion of salvage works as advised by the Heritage Council only requirement L1 shall apply to the identified place.

Artefact Scatters of Medium Conservation Value

Artefact scatters identified as having medium conservation value include sites with high artefact numbers and/or density and/or with identified or potential associated deposit. They are also sites of common type and character. Sites of medium conservation value may either be conserved *in situ* or be the subject of a program of archaeological investigation and salvage. The investigation and salvage may include collection of artefacts, subsurface testing, excavation or other investigative techniques as recommended by the Heritage Council, after consultation with the relevant Aboriginal organisations.

All Aboriginal sites are considered to be significant by the Aboriginal community. Aboriginal people generally express the desire for all cultural heritage sites to be left *in situ* wherever feasible.

Conservation Objective – record and retain, where feasible, or salvage

Specific Requirements – Artefact Scatters of Medium Conservation Value

- M1** Information regarding the description and specific location of the place shall be held in a database of ACT Aboriginal heritage sites.
- M2** Actions that would affect the conservation of the heritage significance of the place constitute 'development' for the purposes of the Act.
- M3** Works that improve or benefit the conservation of the heritage significance of the place are permitted. Proponents of such works shall advise the Heritage Council and consult with the relevant Aboriginal organisations about the proposal. The agreement of the Heritage Council must be obtained prior to works being undertaken.
- M4** Development proponents shall be aware that the presence of an Aboriginal heritage site or sites within a development area may impose constraint upon the development. The nature of the constraint will vary according to the assessed significance of the site/s and the potential heritage impact of the development. For *Artefact scatters* assessed as being of *medium conservation value* the development constraint may range from nil constraint to a requirement to undertake further survey or investigation of all or part of the place, further recording of a place and/or collection of artefacts or other cultural materials, subsurface testing, monitoring during development or salvage excavation, or a requirement to conserve a representative part of the site whilst carrying out further works on the remainder.
- M5** The ACT Heritage Council shall advise the proponent of the degree of constraint, based upon the nature of the development and its potential heritage impact and the significance assessment of the site/s, and in consultation with the relevant Aboriginal organisations.
- M6** Artefacts and/or any other identified significant fabric or components of the site shall not be removed, damaged, altered or disturbed without the prior agreement of the Heritage Council, in consultation with the relevant Aboriginal organisations.
- M7** Any further investigation of sites and/or collection of artefacts and/salvage of site fabric or other cultural materials agreed to by the Heritage Council shall be undertaken by a qualified archaeologist in consultation with the relevant Aboriginal organisations, in accordance with a proposed methodology provided to and endorsed by the Heritage Council, in consultation with the relevant Aboriginal organisations.
- M8** Salvaged or collected materials shall be archived by the Heritage Unit, pending establishment of an appropriate storage facility.
- M9** If collection or salvage of all of the place is advised by the Heritage Council then, following completion of salvage works as advised by the Heritage Council only requirement M1 shall apply to the identified place.

- M10** The place may not be promoted for public use, interpretation or visitation without approval from the Heritage Council in consultation with the relevant Aboriginal groups. Any proposed educational and presentational uses of the place shall be considered by the ACT Heritage Council and relevant Aboriginal organisations on the basis of whether sufficient information is provided about their impacts and potential impacts upon the place.
- M11** Any proposed research that may potentially impact upon the heritage significance of the place shall be conducted in accordance with a research proposal endorsed by the Heritage Council after consultation with the relevant Aboriginal organisations.

Artefact scatters of High Conservation Value

Artefact scatters identified as having high conservation value include sites with high artefact numbers and/or density, with rare, or representative artefacts, and/or with identified or potential associated deposit. They may also be sites of good preservation and condition where the original site structure and contents have survived. Sites of high conservation value are to be conserved *in situ* in an appropriate setting, where feasible. However site investigations for the purposes of improving their conservation or research may be permitted, provided that the relevant Aboriginal organisations have been consulted about any proposed works and agree to their occurrence.

The identification of appropriate conservation actions may require preparation of a Conservation and Management Plan. Actions that propose impact upon their identified heritage values will be considered on a case by case basis by the Heritage Council in consultation with the relevant Aboriginal organisations, and with reference to the applicable Conservation and Management Plan or Research Plan, if prepared.

All Aboriginal sites are considered to be significant by the Aboriginal community. Aboriginal people generally express the desire for all cultural heritage sites to be left *in situ* wherever feasible.

Conservation Objective – record, retain and actively conserve

Specific Requirements – Artefact Scatters of High Conservation Value

- H1** Information regarding the description and specific location of the place shall be held in a database of ACT Aboriginal heritage sites.
- H2** Actions that would affect the conservation of the heritage significance of the place shall constitute ‘development’ for the purposes of the Act.
- H3** Works that improve or benefit the conservation of the heritage significance of the place are permitted. Proponents of such works shall advise the Heritage Council and consult with the relevant Aboriginal organisations about the proposal. The agreement of the Heritage Council must be obtained prior to works being undertaken.
- H4** Development proponents shall be aware that the presence of an Aboriginal heritage site or sites within a development area may impose constraint upon the development. The nature of the constraint will vary according to the assessed significance of the site/s and the potential heritage impact of the development. For *Artefact scatters* assessed as being of *high conservation value* the development constraint may range from nil constraint to a requirement to undertake investigation of a place, prepare and/or implement a Conservation Management Plan for the place, to an inability to undertake part or all of the development within the affected area/s.
- H5** The ACT Heritage Council shall advise the proponent of the degree of constraint, based upon the nature of the development and its potential heritage impact and the significance assessment of the site/s, and in consultation with the relevant Aboriginal organisations.
- H6** Artefacts and/or any other identified significant fabric or components of the site shall not be removed, damaged, altered or disturbed without the prior agreement of the Heritage Council, in consultation with the relevant Aboriginal organisations.
- H7** Any further investigation of sites and/or collection of artefacts and/or other cultural materials agreed to by the Heritage Council shall be undertaken by a qualified archaeologist in consultation with the relevant Aboriginal organisations, in accordance with a proposed methodology provided to and endorsed by the Heritage Council, in consultation with the relevant Aboriginal organisations. Any proposed research that may potentially impact upon the heritage significance of the place shall be conducted in accordance with a research

	proposal endorsed by the Heritage Council after consultation with the relevant Aboriginal organisations.
H8	Salvaged or collected materials shall be archived by the Heritage Unit, pending establishment of an appropriate storage facility.
H9	If collection or salvage of all of the place is advised by the Heritage Council then, following completion of salvage works as advised by the Heritage Council only requirement A1 shall apply to the identified place.
H10	The place may not be promoted for public use, interpretation or visitation without approval from the Heritage Council in consultation with the relevant Aboriginal groups. Any proposed educational and presentational uses of the place shall be considered by the ACT Heritage Council and relevant Aboriginal organisations on the basis of whether sufficient information is provided about their impacts and potential impacts upon the place.
H11	Any proposed research that may potentially impact upon the heritage significance of the place shall be conducted in accordance with a research proposal endorsed by the Heritage Council after consultation with the relevant Aboriginal organisations.
H12	Prior to the approval of any proposed development that may potentially impact upon the heritage significance of the place the proponent shall prepare a Conservation and Management Plan for the place. The plan must be provided to the Heritage Council for endorsement. Prior to giving such endorsement the Heritage Council will consult the relevant Aboriginal groups about the management of the site. Any subsequent development of the place shall then be undertaken in accordance with the endorsed plan, unless the Heritage Council advises the proponent otherwise.

Scarred Trees

Culturally scarred trees may be the product of a variety of activities relating either to the domestic, ceremonial or economic uses of bark, the removal of bark to create a marker tree, or even the removal of bark to gain access to another resource from a tree. Tree bark was an integral component of Aboriginal material culture and was used for shelter, water transport and a wide range of domestic articles. Whilst the identification of trees scarred as a result of Aboriginal cultural practice is made according to strict criteria, their verification may sometimes be problematic. Historic European occupation also resulted in some tree scarring from the use of bark for roofing, early travellers and surveyors also blazed marker trees to identify routes and boundaries. Some natural processes such as lightning, fires, a branch fall which tears away adjacent bark, damage from the impact of falling branches or adjacent trees, animal, bird, insect and fungal attack also produce scars with some elements of similarity to cultural scars. Modern activities also contribute inadvertent scars, such as those made by the impact of heavy machinery and vandalism.

The heritage values of scarred trees are based upon their Aboriginal and archaeological significance. Their significance to Aboriginal people is primarily based on their provision of readily accessible and interpretable evidence of the occupation of land by their ancestors. Scarred trees provide a demonstrable link to place for contemporary Aboriginal people. Their archaeological significance stems both from their physical representation of past cultural practice and for their potential to yield information through research that will increase our understanding of the past.

Scarred trees generally have high conservation value i.e. they are sites of high Aboriginal value and high archaeological value and are to be conserved *in situ* in an appropriate setting and with sufficient curtilage to protect both their primary and ancillary root systems. The identification of appropriate conservation actions may in some circumstances require preparation of a Conservation and Management Plan. Actions that are beneficial in achieving the *in situ* conservation of the tree are permitted. Actions that propose detrimental impact upon their identified heritage values will be considered on a case by case basis by the Heritage Council in consultation with the relevant Aboriginal organisations, and with reference to the applicable Conservation and Management Plan, or in the case of research, with reference to a Research Plan.

Conservation Objective – record, retain and actively conserve

Specific Requirements – Trees of High Conservation Value

- ST1** Information regarding the description and specific location of the place shall be held in a database of ACT Aboriginal heritage sites.
- ST2** Actions that would affect the conservation of the heritage significance of the place constitute 'development' for the purposes of the Act.
- ST3** Works that improve or benefit the conservation of the heritage significance of the place are permitted. Proponents of such works shall advise the Heritage Council and consult with the relevant Aboriginal organisations about the proposal. The agreement of the Heritage Council must be obtained prior to works being undertaken.
- ST4** Development proponents shall be aware that the presence of an Aboriginal heritage site or sites within a development area may impose constraint upon the development. The nature of the constraint will vary according to the assessed significance of the site/s and the potential heritage impact of the development. For *Scarred Trees* the development constraint may range from nil constraint to a requirement to undertake further investigation of a place, prepare a Conservation Management Plan, implement site conservation measures, to an inability to undertake part or all of the development within the affected area/s.
- ST5** The ACT Heritage Council shall advise the proponent of the degree of constraint, based upon the nature of the development and its potential heritage impact and the significance assessment of the site/s, and in consultation with the relevant Aboriginal organisations.
- ST6** The tree and/or any other identified significant fabric or components of the site may not be removed, damaged, altered or disturbed without the agreement of the Heritage Council. Prior to giving such agreement the Heritage Council will consult the relevant Aboriginal groups about the management of the site.
- ST7** The primary and auxiliary root zone of the tree shall be protected from disturbance, compaction of the ground surface, waterlogging or accumulation of fertiliser or pesticide. The extent of the auxiliary root zone for the tree is determined by the formula $1.5 \times h$ where h is equivalent to the maximum crown height of the tree.
- ST8** The removal or felling of the scarred tree shall not be undertaken without the agreement of the Heritage Council, in consultation with the relevant Aboriginal organisations. The removal or trimming of limbs may not be undertaken without the agreement of the Heritage Council, in consultation with the relevant Aboriginal organisations. The felling, lopping, topping or trimming of the tree shall only be undertaken by a qualified arborist.
- ST9** Should the Heritage Council agree that the tree may be felled or removed then the Heritage Council, in consultation with the Aboriginal community, shall advise the appropriate management of the felled tree.

Areas of Potential Aboriginal Heritage Sensitivity

Areas of potential Aboriginal Heritage sensitivity or potential archaeological deposits (PADs) are generally areas defined in the course of professional field or predictive archaeological assessment. They include areas where sites or artefacts are identified as likely to occur, but where ground visibility precludes site or artefact detection or where field survey has not been undertaken. Knowledge of regional and/or local patterns of site occurrence and site formation processes is generally prerequisite for the identification of areas of archaeological potential. Further investigation of areas of archaeological potential may be required prior to or during development. Such further investigation may include sub-surface testing, monitoring or excavation. The significance of such areas will ultimately depend on the outcome of the further investigations.

Conservation Objective – record, retain, investigate, reassess

Specific Requirements – Areas of Potential Aboriginal Heritage Sensitivity

- P1** Information regarding the description and specific location of the place shall be held in a database of ACT Aboriginal heritage sites.
- P2** Actions that would affect the conservation of the heritage significance of the place constitute 'development' for the purposes of the Act.

P3	Works that improve or benefit the conservation of the heritage significance of the place are permitted. Proponents of such works shall advise the Heritage Council and consult with the relevant Aboriginal organisations about the proposal. The agreement of the Heritage Council must be obtained prior to works being undertaken.
P4	Areas of potential Aboriginal heritage sensitivity shall be further investigated to assess their Aboriginal and archaeological significance prior to their development. Development proponents shall ascertain whether such places are known or likely to occur within a development location and shall be aware that the presence of a place within a development area may impose constraint upon the development. For <i>Areas of Potential Aboriginal heritage Sensitivity</i> the development constraint will occur in two stages. Initially the constraint may range from nil constraint to a requirement to undertake further investigative work such as additional field survey and/or subsurface testing. Any subsequent constraint will vary according to the assessed significance of any Aboriginal cultural heritage materials located within the area and the potential heritage impact of the development.
P5	The ACT Heritage Council shall advise the proponent of the degree of constraint, based upon the nature of the development and its potential heritage impact and the significance assessment of the site/s, in consultation with the relevant Aboriginal organisations.
P7	Should further investigation determine that Aboriginal archaeological materials are present in the place of archaeological potential then records about the place shall be updated, and the Heritage Council shall be consulted about the appropriate management of the place. In providing such advice the Heritage Council shall consult with the relevant Aboriginal organisations.

SCHEDULE 2			<i>RESTRICTED</i>
Site Description	<i>Location</i>	Specific Requirements (as per Schedule 1)	Precise Location: (Canberra 1:10 000 Adjusted Grid Coordinates are restricted information)
<i>Bruce Sites 1- 8 are in a separate Register entry</i>			
Belconnen Site 11 A scatter of stone artefacts located in a disturbed context on a hill top gossan outcrop. Recorded - Kabaila 1997.	Part Block 17, Section 4, Bruce	Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9	Grid Reference Map No. 200-606 The location of the place is defined as the area within a circle of 10 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.
Belconnen Site 16 A scatter of stone artefacts located on the northeast spur of a hill. Recorded - Kabaila 1997 Recorded – Heritage Unit 2001	Part Block 17, Section 4, Bruce	Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9	Grid Reference Map No.200-606 The location of the place is defined as the area within a circle of 25 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.

<p>Belconnen Site 19 Two stone artefacts located in a clearing on the side slopes of a hill south of Ginninderra Drive.</p> <p>Recorded- Kabaila 1997.</p>	<p>Part Block 1, Section 3, Bruce</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>Bruce Site 9 A single artefact find located in an exposure on a walking trail crossing a saddle west of Gossan Hill.</p> <p>Recorded – Heritage Unit 2001</p>	<p>Part Block 17, Section 4, Bruce</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB-C-C1/1 A scatter of 4 stone artefacts located on a low ridgeline. Three chert and quartzite stone artefacts were collected from this site. One of the artefacts previously recorded was unable to be found and was not collected.</p> <p><i>Recorded - Kuskie and Boot 1992</i> <i>Collected - Boot and Kuskie 1994</i></p>	<p>Part Section 87, Dunlop</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-612</p> <p>The location of the place is defined as the area within a circle of 10 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p><i>WBTS 1</i> (aka CAS 2290) A single stone artefact located within a disturbed context at the junction of Gooromon Ponds Creek and Ginninderra Creek.</p> <p>Recorded – Klaver 1994</p>	<p>Part Block 1, Section 45, Dunlop</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i></p> <p>Map No.192-612</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p><i>WBTS 2</i> (aka CAS 2291) A single stone artefact located within a small area of recently disturbed ground adjacent to a stormwater drain leading into Gooromon Ponds Creek.</p> <p>Recorded – Klaver 1994</p>	<p>Part Block 1, Section 45, Dunlop</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i></p> <p>Map No.192-612</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p><i>WBTS 3</i> (aka CAS 2292) A scatter of 14 flaked stone artefacts situated on a sheet and gully eroded slope. The artefacts were scattered across areas of very shallow erosion and along the edges of the deeper erosion scars, indicating their lack of stratigraphic depth. However some potential was noted for the site to extend into surrounding grassed areas. Total area of the exposure measures 35 x 35 metres.</p> <p>Recorded – Klaver 1994</p>	<p>Part Block 1569, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p><i>Grid Reference</i></p> <p>Map No.192-612</p> <p>The site is defined as the area within a circle of 25 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p>WB-C-C1/7 (aka CAS 1714) A scatter of 18 stone artefacts revealed in the surface of a training track. The site was on a gently sloping east west alluvial rise facing northwest toward an ephemeral creek. The artefacts extended along the track for a distance of 38 metres, and the site area was estimated to be 102 square metres. The site has been collected however extensive siltation of the training track occurred since the original recording and artefacts had become obscured. Only 4 artefacts were recovered and only 1 of these had previously been recorded.</p> <p>Recorded - Kuskie and Boot 1992 Collected - Boot and Kuskie 1994</p>	<p>Part Section 92, Dunlop</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No.192-612</p>
<p>Belconnen Site 9 A scatter of stone artefacts located in a disturbed context on a minor spur near an ephemeral tributary of Halls Creek.</p> <p>Recorded - Kabaila 1997. Recorded – Heritage Unit 2001</p>	<p>Part Block 5, Section 64, Fraser</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No.200-612</p> <p>The location of the place is defined as the area within a circle of 25 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>Lawson Site 1 A scatter of up to 10 flaked stone artefacts located in disturbed ground adjacent to a perimeter stock fence bordering an old stock route. The integrity of the site has been compromised by recent disturbance, however undisturbed deposits may lie to the west of the fence. The site is situated at mid level on a north facing gentle slope.</p> <p>Recorded - Egloff <i>et al</i> 2000</p>	<p>National Land Part Block 2, Section 6</p>	<p>Recommended only: Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No.208-606</p> <p>The location of the place is defined as the area within a circle of 25 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p>Lawson Site 2 A scatter of flaked stone artefacts located on a disturbed clay ground surface. The site is located at mid level on a north-easterly facing gentle slope.</p> <p>Recorded - Egloff <i>et al</i> 2000</p>	<p>National Land Part Block 2, Section 6 Lawson</p>	<p>Recommended only: Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 15 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>Lawson Site 3 A scatter of flaked stone artefacts located on disturbed ground surfaces in an electricity easement. The site is situated on an easterly facing gentle slope. The potential for the site to be more extensive was noted.</p> <p>Recorded - Egloff <i>et al</i> 2000</p>	<p>National Land Part Block 2, Section 6 Lawson</p>	<p>Recommended only: Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 20 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>Lawson Site 4 A single flaked stone artefact located on an easterly facing gentle slope. Potential for the site to be larger was noted.</p> <p>Recorded - Egloff <i>et al</i> 2000</p>	<p>Part Block 2, Section 13 Lawson</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 10 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>Lawson Site 5 A single flaked stone artefact situated on a low-lying section of track within an erosion gully. Surrounding ground visibility was very low and the potential for the site to be more extensive was noted.</p> <p>Recorded - Egloff <i>et al</i> 2000</p>	<p>Part Block 2, Section 13 Lawson</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 15 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>Lawson Site 6 A scatter of flaked stone artefacts located on an informal vehicle track on a gentle rise east of Lake Ginninderra.</p> <p>Recorded - Egloff <i>et al</i> 2000</p>	<p>Part Block 2, Section 13 Lawson</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 15 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p>Lawson Site 7 A single flaked stone artefact located on an eroded and extensively modified ground surface east of Lake Ginninderra.</p> <p>Recorded - Egloff <i>et al</i> 2000</p>	<p>Part Block 2, Section 13 Lawson</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>Lawson Site 8 A single flaked stone artefact located on the eastern slopes of a low hill. The artefact is situated in a highly disturbed context adjacent a security fence.</p> <p>Recorded - Egloff <i>et al</i> 2000</p>	<p>National Land Part Block 2, Section 6 Lawson</p>	<p>Recommended only: Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>Lawson Site 9 A single flaked stone artefact located on the gentle lower slopes of a north trending spurline. The artefact is located on a disturbed ground surface associated with the installation of a security fence.</p> <p>Recorded – Egloff <i>et al</i> 2000</p>	<p>National Land Part Block 2, Section 6 Lawson</p>	<p>Recommended only: Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>Lawson Site 10 A scatter of flaked stone artefacts located on part of an old farm track within an old stock route. The site is situated on gentle slopes.</p> <p>Recorded - Egloff <i>et al</i> 2000</p>	<p>Part Block 2, Section 13 Lawson</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p>Lawson Site 11 A scatter of flaked stone artefacts located on a south westerly facing spur. The potential for further artefacts to exist in the locality was noted.</p> <p>Recorded - Egloff <i>et al</i> 2000</p>	<p>National Land Part Block 2, Section 6 Lawson</p>	<p>Recommended only: Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>Lawson Site 12 A possible Aboriginal scarred tree located on a gentle slope. The tree is a <i>Eucalyptus blakelyi</i> estimated to be in excess of 200 years of age with an estimated crown height of 20 metres. The scar was estimated to be between 80 and 100 years of age</p> <p>Recorded - Egloff <i>et al</i> 2000</p>	<p>National Land Part Block 2, Section 6 Lawson</p>	<p>Recommended only: Tree of potentially High Conservation Value – ST1-ST2-ST3-ST4-ST5-ST6-ST7-ST8-ST9</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of radius measuring either 30 metres (or 1.5x the crown height of the tree - whichever is the greater), measured from the trunk. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>Lawson Site 13 (aka Belconnen Site 18) A scatter of 18 stone artefacts located in an animal track on the gentle slope of a crest. No artefacts could be located at this site when revisited later, although this could have been due to changes in ground visibility.</p> <p>Recorded – Kabaila 1997 Revisited but not found– Egloff <i>et al</i> 2000</p>	<p>Part Block 2, Section 13 Lawson</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 10 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>Lawson Area of Archaeological Potential An area in proximity to recorded artefact scatters identified as having potential to contain further archaeological materials.</p> <p>Recorded – Egloff <i>et al</i> 2001</p>	<p>Part Block 2, Section 6 (National Land) and part Block 1, Section 4 and Block 2, Section 13, Lawson</p>	<p>Area of Potential Aboriginal Heritage Sensitivity P1-P2-P3-P4-P5-P6 (recommendation only where national land involved)</p>	<p>Grid References</p> <p><i>The area of archaeological potential covers a quadrilateral area defined by the following coordinates:</i></p> <p>Map Nos.200-606, 208-606</p>

<p>WB-C-C1/3</p> <p><i>(aka CAS 1717)</i></p> <p>A scatter of 5 stone artefacts situated on the northeast facing side of a north south ridge. The site is southwest of a southeast tributary of Gooromon ponds Creek. The artefacts were exposed in a vehicle track over an area of 120 square metres.</p> <p><i>Recorded - Kuskie and Boot 1992</i></p>	<p>Belconnen district, no Block number</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference</p> <p>Map No.200-612</p> <p>The location of the place is defined as the area within a circle of 35 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB-C-C1/4</p> <p><i>(aka CAS 1718)</i></p> <p>A small scatter of stone artefacts exposed in the surface of a vehicle track. The site is located northeast of a southern tributary of Gooromon Ponds Creek. Potential for further artefacts in the locality was noted and the site was noted to be of moderate significance.</p> <p><i>Recorded - Kuskie and Boot 1992</i></p>	<p>Part Block 1566, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference</p> <p>Map No.200-612</p> <p>The location of the place is defined as the area within a circle of 15 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB-C-C1/5</p> <p><i>(aka CAS 1719)</i></p> <p>A scatter of 7 stone artefacts located on a vehicle track crossing a gentle ridge. The scatter extends to within 100 m of Halls Creek and is south of its confluence with Gooromon Ponds Creek. The site area is at least 144 square metres and there is potential for it to be larger.</p> <p><i>Recorded - Kuskie and Boot 1992</i></p>	<p>Part Block 1566, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference</p> <p>Map No.192-612</p> <p>The location of the place is defined as the area within a circle of 25 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB-C-C1/6</p> <p><i>(aka CAS 1713)</i></p> <p>A scatter of 5 stone artefacts revealed in a vehicle track on a low rise midway between two tributaries of Gooromon Ponds Creek. The artefacts were located within an area of 24 square metres. Four stone artefacts were collected from the site (one of those previously located was not found).</p> <p><i>Recorded - Kuskie and Boot 1992</i> <i>Collected - Boot and Kuskie 1994</i></p>	<p>Belconnen district, no block number</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.192-612</p>

<p>WB-C-C1/8 (aka CAS 2243) A scatter of stone artefacts located on an erosion scald on the lower slope of a spur line running in an east-west direction towards Gooromon Ponds Creek. The two artefacts were later collected. Test pitting in the location of this site revealed subsurface artefacts at a depth of 15-20 cm that were also collected.</p> <p>Recorded – Boot and Kuskie 1994 Collected – Boot and Kuskie 1994 Test excavated – Boot and Kuskie 1994</p>	<p>Belconnen District, no Block number</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid References</p> <p>Map No.192-612</p>
<p>WB-C-C1/9 (aka CAS 2244) Subsurface artefacts discovered during archaeological test pitting of a small rise above Gooromon Ponds creek, identified as potentially sensitive. Three artefacts were recovered from six test pits in the vicinity. Charcoal was also noted at the base of the test pit, offering some potential for radiocarbon dating of the site/sediments.</p> <p>Recorded - Boot and Kuskie 1994 Collected – Boot and Kuskie 1994 Excavated – Boot and Kuskie 1994</p>	<p>Belconnen District, no Block number</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference</p> <p>Map No.192-612</p>
<p>WB-C-C1/IF1 (aka CAS 1720) An isolated artefact located on a vehicle track 30 m northeast of a tributary of Gooromon Ponds Ck and 250 m southeast of Gooromon Ponds Ck. Potential for further artefacts in the locality was noted.</p> <p>Recorded - Kuskie and Boot 1992</p>	<p>Belconnen district no Block number</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-612</p> <p>The location of the place, including a surrounding area of archaeological potential, is defined as the area within a circle of 25 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB-C-C1/IF2 (aka CAS 1721) An isolated artefact situated on a vehicle track on a small alluvial flat 20 m south east of an ephemeral stream and 250 m southeast of Gooromon Ponds Creek.</p> <p>Recorded - Kuskie and Boot 1992</p>	<p>Part Block 1556, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-612</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p>WB-C-C1/IF3 (aka CAS 1722) Isolated artefact situated on an access track to an electricity transmission line easement. The site is located 300 m southeast of Gooromon Ponds Creek. The site is approximately 50 m from WB-C-C1/IF2.</p> <p>Recorded - Kuskie and Boot 1992</p>	<p>Part Block 1556, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No.200-612</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB-C-C1/2 (aka CAS 1712) A scatter of 26 stone artefacts located on the gently sloping southwest side of a north south oriented ridge. Seventeen stone artefacts and one glass artefact were collected from the site in 1994. The artefacts were collected from an area of approximately 450 square metres. Nine of the previously recorded artefacts could not be relocated.</p> <p>Recorded -Kuskie and Boot 1992 Collected - Boot and Kuskie 1994</p>	<p>Belconnen District, no block number</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No. 200-612</p>
<p>WB-B-C1/1 (aka CAS 1702) An artefact scatter located on an electricity line access track/firebreak adjacent to the ACT border. The site is west of Gooromon Ponds Creek and north of Ginninderra Creek.</p> <p>Recorded - Kuskie and Boot 1992</p>	<p>Part Block 1569 Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No. 192-612</p> <p>The location of the place is defined as the area within a circle of 25 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB-B-C1/2 (aka CAS 1703) A scatter of 5 stone artefacts located on a vehicle track on the north east facing slope of a spur. The site substrate is sandy decomposed granite and the vicinity has been subject to minor disturbance. Five artefacts were initially located within an area of 155 square metres. The site was revisited during follow up work on previously recorded sites in the West Belconnen area and 16 further artefacts were recorded in a northwesterly extension to the original site area.</p> <p>Recorded - Kuskie and Boot 1992 Recorded - Saunders 1995</p>	<p>Part Block 1569 Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No.192-612</p> <p>The location of the place is defined as the area within a circle of 60 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p>WB-B-C1/3 (aka CAS 1704) Two stone artefacts located in a heavily disturbed vehicle track adjacent to the ACT border. The site is located in a low saddle adjacent to the peak of a rocky knoll. The artefacts were located in an area of approximately 5 square metres. The site was rerecorded and three artefacts (2 milk quartz flakes and 1 chert flake) collected from it.</p> <p>Recorded - Kuskie and Boot 1992 Collected – Saunders 1995</p>	<p>Part Block 1569, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3- L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No.192-612</p>
<p>WB-B-C1/4 (Aka CAS 1705) A scatter of 15 stone artefacts exposed within a vehicle track. The site is located on a low rise between two ephemeral streams, north of Ginninderra Creek. At the time of recording the site had been partially disturbed. Potential for the site to be larger was noted. The site was later rerecorded and 20 artefacts were collected during follow up work for the original CRS. Microscopic analysis was carried out on three of the artefacts from this site. Edge wear interpreted as indicative of the scraping of dried animal skin was found on one tabular chert flake. An artefact with similar use wear has also been recorded in the Gungahlin C5 CRS area (Saunders 1995:6).</p> <p>Recorded - Kuskie and Boot 1992 Collected – Saunders 1995</p>	<p>Part Block 1569, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4- M5-M6-M7-M8- M9-M10-M11</p>	<p>Grid Reference Map No.192-612</p>
<p>WB-B-C1/5 (aka CAS 1706) <i>A scatter of 12 stone artefacts located on a vehicle track on the north west side of a gentle hill, north of Ginninderra Creek. The site area was partially disturbed and artefacts were recorded within an area of 112 square metres. The site was rerecorded and a total of 41 artefacts were collected.</i></p> <p>Recorded - Kuskie and Boot 1992 Collected – Saunders 1995</p>	<p>Part Block 1569, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4- M5-M6-M7-M8- M9-M10-M11</p>	<p>Grid Reference Map No.192-612</p>

<p>WB-B-C1/6 (aka CAS 1707) A scatter of 38 stone artefacts located on a vehicle track in the saddle of a spurline. The site is west of Ginninderra Creek. Considered to probably constitute part of a larger site continuous with and including WB-B-C1/7 and WB-B-C1/8). Sites WB-B-C1/6 and WB-B-C1/7 were rerecorded and 21 artefacts collected from their combined site areas.</p> <p>Recorded - Kuskie and Boot 1992 Collected - Saunders 1995</p>	<p>Part Block 1569, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No.200-612</p>
<p>WB-B-C1/7 (aka CAS 1708) A scatter of 12 stone artefacts located on a low ridge 50 metres north of Ginninderra Creek and 53 m north of WB-B-C1/6. The artefacts were recorded within an area of 88 square metres. (Probably part of a larger site continuous with and including WB-B-C1/6 and WB-B-C1/8). Sites WB-B-C1/6 and WB-B-C1/7 were re-recorded and 21 artefacts were collected from their combined site areas.</p> <p>Recorded - Kuskie and Boot 1992 Collected - Saunders 1995</p>	<p>Part Block 1569, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference <i>Map no.200-612</i></p>
<p>WB-B-C1/8 (aka CAS 1709) A scatter of 63 stone artefacts exposed in a vehicle track on the north bank of Ginninderra Creek. (Site is thought to be continuous with WB-B-C1/7).</p> <p>Recorded - Kuskie and Boot 1992</p>	<p>Part Block 1569, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid References The site is contained within a quadrilateral area defined by the following coordinates.</p> <p>Map No.192-612</p>

<p>WB-B-C1/9 (aka CAS 1710) A scatter of 26 stone artefacts located on the north facing side of a low NE-SW ridge. The site is exposed in a vehicle track 150 metres south of an unnamed tributary of Ginninderra Creek. The artefacts are within an area of 240 square metres and there is potential for the site to be larger.</p> <p>Recorded - Kuskie and Boot 1992</p>	<p>Part Block 1569, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No. 192-612</p> <p>The location of the place is defined as the area within a circle of 50 metres radius centred upon the AGC reference.</p>
<p>WB-B-C1/10 (aka CAS 2146)</p> <p><i>Two stone artefacts recorded within an area of 20 x 3 square metres located on a vehicle track near the base of a long gentle south west facing slope. The site was recorded during follow up recording and collection of known sites in the area. This site was not collected.</i></p> <p>Recorded – Saunders 1995</p>	<p>Block 1569 Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No. 192-612</p> <p>The location of the place is defined as the area within a circle of 15 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB-B-C1/IF1 (aka CAS 1715)</p> <p>A single artefact located on a vehicle track on the northeast facing side of a low ridge adjacent to an ephemeral tributary of Gooromon Ponds Creek.</p> <p>Recorded – Navin and Officer 1991 Boot and Kuskie - 1992</p>	<p>Part Block 1569, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No.192-612</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB-B-C1/IF2 (aka CAS 1716)</p> <p>A single artefact located in a saddle on the north south spurline of a rocky hill on the ACT/NSW border.</p> <p>Recorded – Kuskie and Boot 1992</p>	<p>Part Block 1569, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No.192-612</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB-B-C1/IF4</p> <p>A single artefact consisting of a milky quartz core, located on a vehicle track near the base of a western slope of a spur. The site was discovered during follow up recording and collection of known sites. The artefact was not collected.</p> <p>Recorded – Saunders 1995</p>	<p>Part Block 1569, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No.192-612</p> <p>The location of the place is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p>WB1 (aka CAS 1674) An Apple Box (<i>Eucalyptus bridgesiana</i>) tree with a possible Aboriginal scar. The tree is north of the 'Old Lands End' Homestead. The scar is located on the eastern side of the tree, commences approximately 0.5 m above ground, and measures approximately 1.57 by 0.77 metres.</p> <p>Recorded – Navin and Officer 1991</p>	<p>Part Block 166, Belconnen District</p>	<p>Tree of potentially High Conservation Value – ST1-ST2-ST3-ST4-ST5-ST6-ST7-ST8-ST9</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of radius measuring 1.5 x the crown height of the tree, measured from the tree trunk. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB2 (aka CAS 1675) A scatter of five stone artefacts located in the vicinity of scarred tree WB1. The artefacts were exposed at the base of the tree and in an unsealed track running north-south along an adjacent fenceline.</p> <p>Recorded - Navin and Officer 1991</p>	<p>Part Block 166, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No. 200-606</p> <p>The location of the place is defined as the area within a circle of 15 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB3 (aka CAS 1676) A scatter of 5 stone artefacts located west of William Hovell Drive on a tributary immediately south of 'Old Lands End' homestead. Artefacts are exposed in a shallow erosion gully and appear to originate from within the 'A' soil horizon.</p> <p>Recorded - Navin and Officer 1991</p>	<p>Part Block 166, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No.200-606</p> <p>The location of the place is defined as the area within a circle of 25 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB4 (aka CAS 1677) A scatter of 6 stone artefacts distributed along a 50 m length of the eastern bank/gully of an unnamed tributary stream. The artefacts were located at the top of the gully.</p> <p>Recorded - Navin and Officer 1991</p>	<p>Part Block 1600, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No.192-606</p> <p>The site area is defined as a line between the two grid points with 50 m radiating curtilage surrounding the line.</p>

<p>WB5 (aka CAS 1678) A scatter of two stone artefacts, located at the top of the western bank of a creek/gully bank. The artefacts were <i>in situ</i> in the bank profile, in an area of 0.5 of a square metre, and originated from the 'A' soil horizon.</p> <p>Recorded - Navin and Officer 1991</p>	<p>Part Block 1600, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference</p> <p>Map No.192-606</p> <p>The location of the place is defined as the area within a circle of 15 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB6 (aka CAS 1679; Belconnen Site 10) A scatter of approximately 30 stone artefacts with identified potential to be larger. The artefacts occur on both banks of an approximately 100 metre length of an unnamed drainage tributary, leading to the Murrumbidgee River. The artefacts appear to originate from the 'A' soil horizon. The site is 75 metres upstream of WB5 and also includes the area around the confluence of two smaller tributaries.</p> <p>Recorded - Navin and Officer 1991</p>	<p>Part Block 1600, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference</p> <p>The site area is defined by the following grid points (forming a Y-shape with 70 metres radiating curtilage).</p> <p>Map No.192-606</p> <p>Site is also within a broader riparian zone of identified archaeological sensitivity.</p>
<p>WB7 (aka CAS 1673) A sparse scatter of 4 stone artefacts located on the shoulder of a small spurline of a low hill. The shoulder provides the closest elevated ground to Halls Creek. The site appears to have been disturbed, and artefacts are evident in and around a small depression, interpreted as a possible gravel extraction pit.</p> <p>Recorded - Navin and Officer 1991</p>	<p>Part Block 50, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-612</p> <p>The location of the place is defined as the area within a circle of 10 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB8 (aka CAS 1694) A mature dead Eucalypt with three scars, one of which appears natural. Two of the scars, facing north, are interpreted as being possibly Aboriginal in origin. A scatter of stone artefacts was later recorded in the same location. Recorded - Navin and Officer 1991. Kabaila –1997</p>	<p>National Land Part Block 1473, Belconnen District</p>	<p>Recommended only: Tree of potentially High Conservation Value – ST1-ST2-ST3-ST4-ST5-ST6-ST7-ST8-ST9 Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-612</p> <p>The combined site locations are defined as the area within a circle of 40 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p>WB9 (aka CAS 1695) A mature <i>Eucalyptus melliodora</i> (Yellow Box) with a scar on the trunk. The tree is alive and in good condition at the time of recording. The scar faces southeast and is interpreted as Aboriginal in origin.</p> <p>Recorded – Navin and Officer 1991</p>	<p>National Land Part Block 1473, Belconnen District</p>	<p>Recommended only: Tree of High Conservation Value – ST1-ST2-ST3-ST4-ST5-ST6-ST7-ST8-ST9</p>	<p>Grid Reference Map No. 200-612</p> <p>The location of the place is defined as the area within a circle of radius measuring 1.5 x the crown height of the tree, measured from the tree trunk. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WB10 (aka CAS 1696) A mature <i>Eucalyptus blakleyi</i> with a potential Aboriginal scar on the trunk. The scar is located on the northern basal slopes of a small gully.</p> <p>Recorded - Navin Officer 1991</p>	<p>National Land Part Block 1473, Belconnen District</p>	<p>Recommended only: Tree of potentially High Conservation Value – ST1-ST2-ST3-ST4-ST5-ST6-ST7-ST8-ST9</p>	<p>Grid Reference Map No.200-612</p> <p>The location of the place is defined as the area within a circle of radius measuring 1.5 x the crown height of the tree, measured from the tree trunk. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WBIF1 (aka CAS 1680) A single artefact located on the eastern bank of a drainage tributary in the same general location as WB4, 5 and 6. There is potential for further artefacts to be concealed in the locality.</p> <p>Recorded- Navin and Officer 1991</p>	<p>Part Block 1600, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No.192-606</p> <p>The site location is defined as the area within a circle of 10 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>WBIF2 A single stone artefact located on an unsurfaced access track.</p> <p>Recorded – Navin and Officer 1991</p>	<p>Part Block 1360, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference Map No. 192-606</p> <p>The site location is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>HTB17 (aka CAS 1813) A scatter of 4 flaked stone artefacts located on a low ridge line above a creek.</p> <p>Recorded – Williams 1992</p>	<p>National Land Part Block 1473, Belconnen District</p>	<p>Recommended only: Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference Map No. 200-612</p> <p>The site area is defined as the area within a circle of 20 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p><i>Belconnen Site 12</i></p> <p>A scatter of stone artefacts located on gentle slopes overlooking a drainage tributary of Black Mountain Creek. The artefacts are exposed within an area of localised ground disturbance.</p> <p>Recorded - Kabaila 1997 Recorded – Heritage Unit 2001</p>	<p>Part Block 1550, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p><i>Grid Reference</i></p> <p>Map No.200-600</p> <p>The site area is defined as the area within a circle of 20 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference. The site is within a broader zone of identified archaeological sensitivity.</p>
<p><i>Belconnen Site 14</i></p> <p>A small scatter of stone artefacts, revealed in kangaroo pads, located on a stony ridge/ spurline above a drainage tributary of Black Mountain Creek.</p> <p>Recorded - Kabaila 1997 Recorded – Heritage Unit 2001</p>	<p>Part Block 1550, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p><i>Grid Reference</i></p> <p>Map No.200-600</p> <p>The site area is defined as the area within a circle of 10 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference. The site is within a broader zone of identified archaeological sensitivity.</p>
<p><i>Belconnen Site 15</i></p> <p>A small scatter of stone artefacts located in a clearing on gentle valley slopes above an ephemeral tributary of Black Mountain Creek. The site is within a broader zone of archaeological potential.</p> <p>Recorded - Kabaila 1997 Recorded – Heritage Unit 2001</p>	<p>Part Block 1550, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p><i>Grid Reference</i></p> <p>Map No.200-600</p> <p>The site area is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference. The site is within a broader zone of archaeological sensitivity.</p>
<p><i>Belconnen Site 22</i></p> <p>A scatter of 14 stone artefacts exposed in a sheet eroded area on a gentle slope above Black Mountain Creek.</p> <p>Recorded - Kabaila 1997 Recorded – Heritage Unit 2001</p>	<p>Part Block 1439, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p><i>Grid Reference</i></p> <p>Map No.200-600</p> <p>The site is defined as the area within a circle of 20 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p><i>Belconnen Site 29</i></p> <p>An extensive scatter of flaked stone artefacts on the crest and gentle slopes of a spur. Artefacts are currently evident in several eroded areas within an area of approximately 120 x 40 metres, and the site potentially extends further. Artefacts are exposed within sheet eroded areas and the site is considered to potentially extend into surrounding uneroded areas.</p> <p>Recorded - Kabaila 1997 Recorded – Heritage Unit 2001</p>	<p>Part Block 180, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference</p> <p>The site is contained within a quadrilateral area defined by the following AGC coordinates:</p> <p>Map No.200-606</p>
<p>Belconnen Area of Archaeological Potential 1</p> <p>An area of creek flats and gentle spurs in proximity to recorded artefact scatters and with potential to contain further archaeological materials.</p> <p>Recorded – Heritage Unit 2001</p>	<p>Part Block 1550, Belconnen District</p>	<p>Area of Potential Aboriginal Heritage Sensitivity P1-P2-P3-P4-P5-P6</p>	<p>Grid References</p> <p><i>The area of archaeological potential covers a quadrilateral area defined by the following coordinates:</i></p> <p>Map No.200-600</p>
<p>Site LMWQCC-1 (aka CAS 1731)</p> <p>A scatter of stone artefacts located in exposed ground on a ridgeline leading to the Molonglo River. The artefacts were exposed in disturbed bare ground within a <i>Callitris</i> pine plantation. It is considered that the site has potential to be more extensive.</p> <p>Recorded – Packard 1992</p>	<p>Part Block 1553, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.192-606</p> <p>The site is defined as the area within a circle of 15 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>MRC 121 (Aka CAS 172)</p> <p>A scatter of flaked stone artefacts scattered along an unformed farm track on a slope leading down to the Molonglo River. The site was noted to extend for at least 175 m along the track and was thought likely to extend off track into grassed areas.</p> <p>Recorded – Barz and Winston Gregson 1981; Packard 1992 Collected – part collection undertaken by Barz and Winston Gregson 1982</p>	<p>Part Block 1553, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference</p> <p>Map No.192-606</p> <p>The site is defined as the area within a circle of 100 metres radius centred upon the AGC coordinates.</p>

<p>Site LMWQCC-3 <i>(aka CAS 1884)</i></p> <p>A scatter of stone artefacts at the western end of a spurline above the Molonglo river corridor. Rabbit diggings have extensively disturbed the site.</p> <p>Recorded - Packard 1992</p>	<p>Part Block 1558, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.192-606</p> <p>The site is defined as the area within a circle of 15 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>LMWQCC – IF1 <i>(aka CAS 1728)</i></p> <p>A single stone artefact located on a small exposure of bedrock on the southern side slope of a steep narrow valley. At the time of recording it was considered that the artefact had most likely been transported downslope in eroding sediments to its current location.</p> <p>Recorded - Packard 1993</p>	<p>Part Block 1553, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.192-606</p> <p>The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>LMWQCC-IF2 <i>(Aka CAS 1729)</i></p> <p>A single stone artefact located on the southern side of the crest of a steep ridge. The artefact was exposed within the surface of a narrow walking track within the Murrumbidgee River Corridor reserve.</p> <p>Recorded - Packard 1993 IF2</p>	<p>Part Block 1558, Belconnen District (Within Corridor Reserve)</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.192-606</p> <p>The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>LMWQCC- IF3 <i>(aka CAS 1730; part MRC121)</i></p> <p>An isolated find located near the lower gate of the Lower Molonglo Water Quality Control Centre. The artefact was located in disturbed ground and the consultant considered that it might have represented the upper extent of MRC121.</p> <p>Recorded - Packard 1993</p>	<p>Part Block 1553, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No. 192-606</p> <p>The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>CAS173 Aka MRC 122.</p> <p>An open artefact scatter located approximately 250 metres east of the Murrumbidgee River on the south bank of a major tributary creek.</p> <p>Recorded – Barz and Winston Gregson 1981</p>	<p>Part Block 1518, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No. 192-606</p> <p>The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p>CAS361 Aka CR1 A scatter of stone artefacts.</p> <p>Recorded – Barz 1980</p>	<p>Part Block 1518, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.192-606</p> <p>The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>CAS 362 Aka CR2 A scatter of flaked stone artefacts located in the ploughzone.</p> <p>Recorded - Barz 1980</p>	<p>Part Block 1518, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.192-606</p> <p>The site is defined as the area within a circle of 25 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>CAS 363 (aka CR3a) A scatter of flaked stone artefacts located in the ploughzone.</p> <p>Recorded – Barz 1980</p>	<p>Part Block 1601, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No. 192-606</p> <p>The site is defined as the area within a circle of 25 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>MRC 123 (aka CAS 174) A rock shelter with surface stone artefacts and potential to contain archaeological /cultural deposit.</p> <p>Recorded – Barz and Winston-Gregson 1982</p>	<p>Part Block 1518, Belconnen District</p>	<p>Artefact Scatter of High Conservation Value – H1-H2-H3-H4-H5-H6-H7-H8-H9-H10-H11-H12 and associated potentially sensitive deposit P1-P2-P3-P4-P5-P6</p>	<p>Grid Reference</p> <p>Map No. 192-606</p> <p>The site is defined as the area within a circle of 25 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p>Molonglo A1 (aka CAS 1821) A scatter of stone artefacts located on the lower southern slopes of a spur west of Deep Creek.</p> <p>Recorded – Saunders 1994</p>	<p>Part Block 1571, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p>Grid Reference</p> <p>Map No.200-600</p> <p>The site is defined as the area within a circle of 20 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p><i>Molonglo A2</i> (aka CAS 1822) A scatter of stone artefacts located on level ground at the southern end of a long gentle slope above the Molonglo river corridor. Recorded – Saunders 1994</p>	<p>Part Block 1020, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i> Map No.200-600 The site is defined as the area within a circle of 20 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p><i>Molonglo A8</i> (aka CAS 1828) A scatter of 8 stone artefacts located on a lower, north facing slope east of a tributary of Belconnen Creek. Recorded – Saunders 1994</p>	<p>Part Block 1601, Belconnen District</p>	<p>Artefact Scatter of Medium Conservation Value – M1-M2-M3-M4-M5-M6-M7-M8-M9-M10-M11</p>	<p><i>Grid Reference</i> Map No.192-606 The site is defined as the area within a circle of 10 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p><i>Molonglo A9</i> (aka CAS 1829) An artefact scatter located near the end of a broad level spur above a sheer descent to the Molonglo River. The site is 25 m east of a hanging valley and 40 m south of a northern boundary fence. The site is considered to have potential to be more extensive, but its location has been disturbed by rabbit warrens and ditching. Recorded – Saunders 1994</p>	<p>Part Block 183, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i> Map No.192-606 The site is defined as the area within a circle of 40 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p><i>Molonglo IF1</i> (aka CAS 1834) A single artefact find located on south facing upper slopes in the Molonglo River Corridor. Recorded – Saunders 1994</p>	<p>Part Block 1572, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i> Map No.200-600 The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p><i>Molonglo IF2</i> (aka CAS 1835) A single artefact find located at the base of an erosion gully in a disused quarry in the Molonglo River Corridor. Recorded – Saunders 1994</p>	<p>Part Block 1572, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i> Map No.200-600 The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p><i>Molonglo IF3</i> (aka CAS 1836) A single artefact find located in a grassy area on the south western midslope of a spur leading towards the Molonglo River. Recorded – Saunders 1994</p>	<p>Part Block 1572, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i> Map No.200-600 The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p><i>Molonglo IF4</i> (aka CAS 1837) A single artefact find located on the mid slopes of a spur leading down to the Molonglo River. Recorded – Saunders 1994</p>	<p>Part Block 1572, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i> Map No.200-600 The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p><i>Molonglo IF5</i> (aka CAS 1838) A single artefact find located on a slope west of an unnamed tributary near the Molonglo River. Recorded – Saunders 1994</p>	<p>Part Block 1571, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i> Map No. 200-600 The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p><i>Molonglo IF 14</i> (aka CAS 1847) A single artefact find located on level grassed ground behind a knoll overlooking the Molonglo River. Recorded – Saunders 1994</p>	<p>Part Block 183, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i> Map No.192-600 The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p><i>Molonglo IF 15</i> (aka CAS 1848) A single artefact find located on level ground approximately 100 m north of an ephemeral watercourse and 200 m south of a tributary of the Molonglo River. Recorded – Saunders 1994</p>	<p>Part Block 1429, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i> Map No.192-606 The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p><i>Molonglo IF 16</i> (aka CAS 1849) A single artefact find located on a stock trail on a steep west facing slope below the terminal end of a ridgeline. Recorded – Saunders 1994</p>	<p>Part Block 183, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i> Map No.192-606 The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p><i>Molonglo IF 17</i> (aka CAS 1850) A single artefact find exposed in a stock trail near the base of a gentle westerly slope of a ridgeline. Recorded – Saunders 1994</p>	<p>Part Block 183, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i> Map No.192-606 The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p><i>Molonglo IF25</i> (aka CAS 1858) A single artefact find located on a steep south west facing slope below the terminal end of a ridgeline spur, above an ephemeral watercourse draining to the Molonglo River. Recorded – Saunders 1994</p>	<p>Part Block 1558, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i> Map No.192-606 The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>
<p><i>CAS 1238</i> (aka Stromlo 6/8 9Q1) A single artefact find located on a forestry track. Recorded – Bulbeck and Boot 1990</p>	<p>Part Block 1544, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p><i>Grid Reference</i> Map No.200-600 The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</p>

<p>CAS 1264 (aka Stromlo 1/2 3/6E1)</p> <p>A single artefact find located on a forestry track.</p> <p>Recorded – Bulbeck and Boot 1990</p>	<p>Part Block 1571, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-600</p> <p><i>The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</i></p>
<p>CAS 1266 (aka Stromlo 38G1)</p> <p>A single artefact find located on a forestry track.</p> <p>Recorded – Bulbeck and Boot 1990</p>	<p>Part Block 1543, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-600</p> <p><i>The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</i></p>
<p>CAS 1267 (aka Stromlo 11H1)</p> <p>A single artefact find located on a forestry track.</p> <p>Recorded – Bulbeck and Boot 1990</p>	<p>Part Block 1547, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-600</p> <p><i>The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</i></p>
<p>CAS 1274 (aka Stromlo 1/6 2/6N1)</p> <p>A single artefact find located on a forestry track.</p> <p>Recorded – Bulbeck and Boot 1990</p>	<p>Part Block 1544, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-600</p> <p><i>The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</i></p>
<p>CAS 1275 (aka Stromlo 12B2)</p> <p>A single artefact find located on a forestry track.</p> <p>Recorded – Bulbeck and Boot 1990</p>	<p>Part Block 1544, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-600</p> <p><i>The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</i></p>

<p>CAS 1268 (aka Stromlo 12I1)</p> <p>A single artefact find located on a forestry track.</p> <p>Recorded – Bulbeck and Boot 1990</p>	<p>Part Block 1502, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-600</p> <p><i>The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</i></p>
<p>CAS 1276 (aka Stromlo 12B4)</p> <p>A single artefact find located on a forestry track.</p> <p>Recorded – Bulbeck and Boot 1990</p>	<p>Part Block 1573, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-600</p> <p><i>The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</i></p>
<p>CAS 1239 (aka Stromlo 6/8 9H1)</p> <p>A single artefact find located on a forestry track.</p> <p>Recorded – Bulbeck and Boot 1990</p>	<p>Part Block 1355, Belconnen District</p>	<p>Artefact Scatter of Low Conservation Value – L1-L2-L3-L4-L5-L6-L7-L8-L9</p>	<p>Grid Reference</p> <p>Map No.200-600</p> <p><i>The site is defined as the area within a circle of 5 metres radius. The place is located somewhere within a circle of 50 m radius around the AGC reference.</i></p>

Management Recommendations

In assessing these places for the interim Heritage places register the Heritage Council recommends that the following actions be undertaken to improve the conservation of currently unrecorded Aboriginal heritage places within the District of Belconnen. This is a recommendation only and has no legal effect.

1. Cultural heritage survey should be undertaken within any parts of Belconnen District that have not yet been subject to archaeological survey, at an early stage of planning for future development. Undeveloped areas within a zone extending 100 metres either side of major creeklines eg. Ginninderra Creek, Gooromon Ponds Creek and major tributaries of the Murrumbidgee River, and within 250 metres either side of the Murrumbidgee and Molonglo Rivers should be considered potentially archaeologically sensitive.
