Good morning,

I am writing to request information under the Freedom of Information Act.

[REDACTED] Namadgi National Park. I am seeking to fully understand pest control programs (specifically wild dogs) which have taken place in recent years. I have requested this information from the Biosecurity and Rural Services Team, without success.

I am interested in any information that might assist me in learning exactly where and when control works have occurred in recent years. I am also interested in learning how my concerns and requests have been managed by Namadgi and EPSDD. I intend to use this information to understand what aspects of wild dog control are working well, and what course of action may be required into the future.

I request the following information please;

- Any data that can describe the exact location and intensity of wild dog trapping from January 2021 until now. This may include maps, GPS tracking data from the pest animal controller vehicle, or any other data which can demonstrate exactly where control works have taken place. Please note that control works may have been provided by contractors, as well as employed staff.
- Any data that can describe the exact location and intensity of wild dog baiting from January 2021 until now. This may include maps, GPS tracking data from the pest animal controller vehicle, or any other data which can demonstrate exactly where control works have taken place. Please note that control works may have been provided by contractors, as well as employed staff.
- Copies of any correspondence that could prove that a request for aerial baiting was undertaken by the Biosecurity and Rural Services team, from January 2021 until now. This may include correspondence between the BRS team and Environmental Protection Agency (EPA) eg: email request, formal application, meeting record, phone call record, any document that could prove aerial baiting has been requested.
- Records of any reports, submissions or briefings (emails, letters, reports etc) submitted to Legislative Assembly from Namadgi, with regards to 1080 poison, and / or wild dogs. Such reports may have been presented by the Biosecurity and Rural Services Team in early 2023.
- Copies of any meeting records (phone, email, internet, briefings, updates) relating to wild dog management issues / concerns in Shannons Flat. This may include concerns raised by [REDACTED], the Shannons Flat - Bredbo - Michelago and Dry Plains Wild Dog Management Group, and / or Adaminaby -Yaouk Wild Dog Management Group.

- Copies of any communication between Namadgi and NSW Local Land Services, relating to wild dog management from January 2021 until now. This information may contain keywords such as cross border proposal, nil tenure or cost sharing.
- Any data that may demonstrate the total number of livestock lost to Namadgi wild dogs from January 2021 until now. Any data held by Namadgi about livestock losses around their full perimeter (ie: not limited to Shannons Flat).

Please feel very welcome to contact me for further details if needed.
