

Dear Manager

I haven't got time to read the whole plan sorry.

However, I would like to express my opinion.

We (the people of ACT) need to leave the kangaroos alone.

No more killing and plans to manage them. We are building in to their territory.

Kangaroos are native to Australia in this region, how can they be treated as a pest then?

Yes, I see dead kangaroos on the side of the road, but there are more kangaroo deaths than humans when car and animal collide.

Please stop punishing these native animals by eradicating them just so the government can make money out of selling land for residential and business.

We have ample housing in the ACT now and we can't keep calling ourselves the bush capital if the animals that live in the bush are all shot dead.
